

Crate Mold

This mold is used to manufacture plastic crates. It can be used to create crates of varying dimensions.

Product Overview

High-Performance Crate Moulding Solutions

These professional-grade crate moulds are engineered for high-efficiency production, offering versatile options for various crate dimensions. Designed with precision, the range includes specialized 2-cavity configurations and foldable crate designs to suit diverse logistics and storage requirements. Built for durability and consistent output, these moulds are ideal for manufacturing robust plastic crates for the agricultural and produce sectors.

Technical Specifications

Available Mould Configurations

- 2-cavity crate mould core
- Foldable crate mould
- Standard crate mould

Key Material Features

Moldmax, High-Durability, Precision Engineered

Dimensions & Capacity

Standard Mould Dimensions

Length (mm)	Width (mm)	Height (mm)
300	400	160
500	380	325
580	375	160
580	375	300
600	400	120

Primary Application

Fruit Crates • Vegetable Crates • Logistics
