

Creepage Distance Measurement Gauge

This creepage distance test card is designed for the accurate measurement of surface distances between conductive parts. It features multiple calibrated blades with varying thicknesses for assessing insulation and safety standards.

Product Overview

Precision Creepage Distance Gauge

The Creepage Distance Measurement Gauge is an essential tool for electrical safety testing and quality control. Designed for precision, this test card features a comprehensive range of calibrated blades that allow for the accurate verification of surface distances between conductive parts. It is an indispensable instrument for engineers and technicians ensuring compliance with electrical insulation standards.

Unit of Measure

Millimeters (mm)

Application

Primary Applications

Electrical Safety Testing, Quality Control, Insulation Verification, Compliance Testing
