

Crimped Copperized Wire Wheel Brush

This wheel brush features crimped and copperized wire. It is designed for use with power tools for surface preparation, cleaning, and deburring applications.

Product Overview

Professional Surface Preparation Tool

This crimped and copperized wire wheel brush is engineered for efficient surface preparation, cleaning, and deburring tasks. Designed for use with standard power drills, it features a 75mm diameter and durable 0.3mm steel wire construction. It is an essential accessory for professional maintenance and metalworking applications.

Technical Specifications

Maximum Operating Speed

4500 RPM

Max RPM

Diameter	75 mm
Wire Thickness	0.3 mm
Arbor/Chuck Size	6 mm
Material	Steel Wire, Copperized

Usage Information

Safety Requirements

- Always wear eye protection
- Ensure secure mounting in drill chuck
- Do not exceed maximum RPM rating

Primary Applications

Surface Preparation • Cleaning • Deburring
