

Crimped Steel Wire Cup Brush

This cup brush features a dense arrangement of crimped steel wires for effective surface preparation. It is designed for mounting on power tools such as angle grinders for removing rust, scale, paint, and other contaminants from metal surfaces.

Product Overview

Crimped Steel Wire Cup Brush

This high-quality crimped steel wire cup brush is engineered for effective surface preparation, cleaning, and deburring tasks. Featuring a dense arrangement of crimped steel wires anchored in a robust cup design, it provides focused cleaning action for demanding industrial applications. It is specifically designed to remove rust, scale, paint, and other contaminants from metal surfaces, ensuring optimal results for professional users.

Technical Specifications

Material	Crimped Steel Wire
Mounting	Central threaded arbor and nut
Compatible Tools	Angle Grinders

Applications

Primary Applications

- Surface preparation
- Cleaning
- Deburring
- Rust removal
- Scale removal
- Paint removal
