Overview

Efficient Crop Harvesting Solution

This reaper binder is an advanced agricultural machine designed to automate the cutting and binding process for various crops. Featuring a differential steering system, it offers excellent maneuverability across diverse terrains, including plains, hills, and slopes. It is engineered to streamline harvesting operations, significantly increasing productivity for small to medium-sized farming operations.

Technical Specifications

Model Number	4K-90
Compatible Crops	Wheat, Rice, Barley, Oat, Reed
Steering System	Differential Steering

Operational Capabilities

Terrain Suitability

- Plain fields
- Hills
- Slopes
- Small fields

Automation Functions

Automatic Cutting • Automatic Binding

Commercial Information

Warranty Period

12 Months

Warranty

Accepted Payment Methods

- Telegraphic Transfer (T/T)
- Irrevocable Letter of Credit (L/C)

Shipping Terms

FOB (Free On Board)
