Product Overview

High-Performance Cross-Flow Air Curtain

This cross-flow air curtain is engineered to create an invisible, high-efficiency barrier of air, effectively separating indoor and outdoor environments. By minimizing air exchange, it helps maintain consistent indoor temperatures, reduces energy loss, and prevents the entry of dust, insects, and pollutants. Its robust construction and versatile control options make it an ideal solution for commercial and industrial entrances.

Technical Specifications

Available Lengths

- 900mm
- 1000mm
- 1200mm
- 1500mm

Installation Height

2.3 m

Min Height

3 m

Max Height

Rated Voltage

220-240V

Rated Frequency

50 HZ

Control & Customization

Customization

OEM Available • ODM Available • Silk Printing Logo

Control Options

Switch Control, Remote Control, Wire Control Box, Magnetic Sensor Control
