

Cross Lug Wrench (17-23mm Sockets)

This cross lug wrench is designed for tightening and loosening lug nuts on vehicle wheels. It features four socket sizes (17mm, 19mm, 21mm, 23mm) and is made from durable metal for high torque.

Product Overview

Professional Cross Lug Wrench

This cross lug wrench, often referred to as a four-way or spider wrench, is an essential hand tool engineered for the efficient tightening and loosening of vehicle wheel lug nuts. Designed with four distinct socket sizes permanently integrated into a durable cross-shaped bar, it provides the necessary leverage and torque for reliable wheel maintenance. Its robust construction ensures even force distribution, helping to protect lug nuts and wheel studs during operation.

Technical Specifications

Available Socket Sizes

- 17
- 19
- 21
- 23

Standard Compliance

DIN 899

Key Features

Tool Configuration	Cross-shaped (Four-way)
Primary Application	Wheel Maintenance, Lug Nut Removal, Automotive Repair
