

Cross Slide Vise

This cross slide vise is a precision tool for secure and accurate workpiece holding in machining and fabrication. It features a robust construction and a sliding mechanism for precise positioning, enhancing versatility for complex machining tasks.

Overview

Precision Cross Slide Vise

This precision cross slide vise is engineered for secure and accurate workpiece holding in demanding machining and fabrication environments. Featuring a robust construction from high-grade materials, it provides exceptional stability and durability during operation. The dual-axis sliding mechanism allows for precise positioning, while hardened and ground jaws ensure a firm, reliable grip for milling and drilling tasks.

Key Features

Hardened Jaws, Dual-Axis Sliding, High-Grade Construction, Precision Machining, Smooth Lead Screws

Technical Specifications

Size and Capacity Specifications

Size	Jaw Width	Jaw Opening	Net Weight	Packing Size
3"	75mm	55mm	5.5kgs	250x250x140mm
4"	100mm	75mm	7.5kgs	270x270x155mm
5"	125mm	95mm	9.5kgs	290x290x155mm
6"	150mm	115mm	14.5kgs	320x320x175mm
