

Cross Wheel Lug Wrench

This cross-shaped wheel wrench is made from chrome vanadium steel for enhanced durability. It features four socket sizes to accommodate different lug nuts, providing leverage for efficient tire changes and automotive maintenance.

Product Overview

Professional Cross Lug Wrench

This high-quality cross-shaped wheel wrench is designed for automotive maintenance and tire service applications. Featuring a versatile four-way socket configuration, it provides the necessary leverage for efficient loosening and tightening of lug nuts. Its durable design is built to withstand rigorous use, making it an essential tool for professional mechanics and automotive service centers.

Technical Specifications

Design Features

- Cross-shaped geometry for balanced leverage
- Four-way universal socket sizing
- Spin-off action for quick operation
- High-quality robust construction

Socket Compatibility

17mm, 19mm, 21mm, 23mm

Application

Automotive tire maintenance and lug nut service
