

Crown Wheel and Pinion Gear Set

This high-quality crown wheel and pinion set is designed for robust performance and durability. The precision-engineered gear teeth ensure smooth and efficient power transmission.

Product Overview

High-Performance Gear Set

This crown wheel and pinion gear set is precision-engineered to provide robust performance and durability in demanding industrial and automotive environments. Designed for efficient power transmission, the gear teeth are crafted to ensure smooth operation and minimal wear. This set is manufactured to meet stringent quality standards, making it a reliable choice for applications requiring consistent rotary motion.

Technical Specifications

Part Number	SM-1110
Gear Ratio	8:39
Net Weight	6.77 Kg
