

# CRT Monitor Flyback Transformer

Flyback transformer designed for use in 15-19 inch color monitors. This transformer is a crucial component for generating the high voltage required to operate the cathode ray tube (CRT) within the monitor.

## Product Overview

### High-Performance CRT Flyback Transformer

This flyback transformer is engineered specifically for 15-19 inch color monitors, serving as a critical component for generating the high voltage required by cathode ray tubes. Designed for reliability and longevity, it facilitates seamless replacement or repair of malfunctioning monitor units. Its compact construction includes integrated wiring and connectors to ensure straightforward installation for professional technicians.

## Technical Specifications

### Design Features

- Integrated wiring
- Pre-fitted connectors
- Compact form factor

Compatible Monitor Sizes	15 inch, 17 inch, 19 inch
Application	Color CRT Monitors
Primary Function	High voltage generation for cathode ray tubes
