

CRT Monitor with Square Aspect Ratio

This CRT monitor features a nearly square display aspect ratio and a white plastic casing. It is designed with ventilation holes on the side for cooling.

Product Overview

Classic CRT Display Technology

This CRT monitor features a traditional square aspect ratio, designed for applications requiring legacy display compatibility or specific visual aesthetics. Its robust white plastic casing and stable circular base provide a functional, reliable solution for specialized environments. The unit is optimized for clear, direct visual output, making it suitable for industrial, commercial, or retro-computing setups.
