

CRT Television Set

This is a CRT television set with a rectangular screen and a built-in speaker panel. It is a standard definition television with a thick bezel and a boxy design.

Product Overview

Classic CRT Television Display

This black CRT television set features a traditional boxy design, making it a reliable solution for specialized applications requiring standard definition displays. The unit is equipped with an integrated speaker panel positioned at the bottom, providing convenient built-in audio. With its functional control interface and inclusion of a USB port, this television offers straightforward connectivity for compatible peripheral devices.
