

CRT Television with Analog Tuner

This cathode-ray tube (CRT) television has integrated speakers and a power indicator light. The TV features a standard 4:3 aspect ratio screen and a built-in tuner for analog broadcasts, as well as composite video and audio inputs.

Overview

Professional Analog Display Solution

This cathode-ray tube (CRT) television offers a robust and reliable display solution for traditional analog broadcast environments. Featuring a classic 4:3 aspect ratio and integrated side-mounted speakers, it is designed for environments that require native compatibility with legacy video signals. The sleek black finish provides a professional aesthetic, while the external composite inputs ensure simple connectivity for peripheral audio-visual equipment.
