

CRT Television with Gray Screen

This is a cathode ray tube (CRT) television. It features a dark bezel surrounding a gray screen and a silver-colored base.

Product Overview

HK27 Series CRT Television

The HK27 Series CRT television offers a classic viewing experience with a distinct gray screen and a robust dark bezel design. Built with traditional cathode ray tube technology, this unit provides deep black levels and wide viewing angles that remain appreciated in specific professional and enthusiast applications. It features a sturdy silver-colored base, making it a stable choice for environments where traditional display technology is preferred.
