

# Crusher Blow Bars for Horizontal Shaft Impactors

Crusher blow bars are essential wear parts for horizontal shaft impactors used in crushing applications. These durable bars are made from high-chrome alloy steel and are designed for use in mining, quarry, recycling, and demolition fields.

## Product Overview

### High-Performance Blow Bars

These wear-resistant blow bars for Horizontal Shaft Impactors are engineered for superior durability in demanding mining and aggregate processing environments. Offering a 10% longer service life compared to standard domestic alternatives, these components provide a cost-effective solution that rivals imported parts. They are designed to withstand high-impact forces, ensuring consistent crushing performance and significantly reduced operational downtime.

## Performance Metrics

### Lifespan Improvement

**10 %**

Increased Service Life

### Manufacturing History

20 Years

## Compatibility

### Supported Mill Types

- FL Smidth ATOX
- Loesche LM
- GEBR. PFEIFFER
- MPS
- RM
- CKP
- MLS
- MPF
- TRM
- HRM
- ZGM
- HP

## Service

### Customization

Yes

## Global Reach

### Export Markets

Russia, Germany, Pakistan, Costa Rica, Argentina, Greece, Colombia, Far East
