

CT12L Resin Water Filter Dispenser

This water dispenser is designed for household use and provides filtered water through a resin filtration system. It features a two-tier design with a transparent upper reservoir and a lower collection tank.

Product Overview

Clean Water Solution

The CT12L Resin Water Filter Dispenser is a reliable solution designed for consistent water purification. Utilizing a specialized resin filtration system, it effectively removes impurities and softens water for a cleaner taste. The unit is built with food-grade materials, ensuring safety and durability for daily use.
