

Cube Scribe for Precision Marking

This high-precision coordinate measuring machine features a multi-crossed scribe. Its cube design allows for precision machining, light weight, and flexible operation.

Product Overview

Precision Marking Instrument

The Cube Scribe is a high-precision instrument designed for coordinate measuring and multi-crossed scribing tasks. Featuring a robust cube-shaped design, this tool ensures stable, repeatable measurements and accurate positioning on workpieces. Its lightweight construction combined with high surface hardness provides both operational flexibility and long-term durability for demanding machining and fabrication environments.

Technical Specifications

Series	SZJ Series
Key Design Features	Cube Design, High Surface Hardness, Lightweight, Precision Machined

Operational Details

Operational Benefits

- Flexible operation
- Easy to operate
- Long service life

Common Applications

Machining • Fabrication • Quality Control
