

Cubic Ice Production Machine

This machine is designed for efficient and reliable cubic ice production. It is ideal for commercial applications requiring consistent and clear ice cubes.

Overview

Industrial Cubic Ice Production

This industrial-grade cubic ice machine is engineered specifically for demanding food service and commercial environments. It utilizes premium refrigeration components to deliver high efficiency, significant energy savings, and quiet operation. Designed for reliability, the system maintains high yield rates even in peak summer conditions and features an intuitive, automated control system for seamless daily use.

Key Features

Automation & Safety

- Automatic start and stop functionality
- Automatic shut-off when ice bin is full
- Water shortage protection
- Integrated troubleshooting system

Performance Highlights

90 %

Summer Yield Efficiency

Installation & Maintenance

Setup Requirements

Pre-installed and tested at the factory; requires only connection to water supply and power source.

Application

Suitable Applications

Food Service, Industrial Cooling, Beverage Cooling, Food Displays
