

Cuplock Scaffolding Steel Plank

Steel plank designed for cuplock scaffolding systems. It provides a stable and secure working platform.

Product Overview

High-Strength Cuplock Steel Plank

This durable steel plank is specifically engineered for integration with cuplock scaffolding systems, providing a stable and secure working platform for construction and industrial projects. Constructed from high-strength steel, it offers superior load-bearing capacity and long-term durability. The design features interlocking edges to minimize movement and ensure a secure connection, while the galvanized finish provides essential corrosion resistance for outdoor use.

Technical Specifications

Surface Treatment

Galvanized

Key Features

- Interlocking edges for secure connection
- High-strength steel construction
- Corrosion-resistant finish
- Designed for cuplock systems

Primary Applications

Construction, Maintenance, Industrial
