

Cupping Therapy Set

This cupping therapy set includes transparent plastic cups in various sizes and a hand-operated suction pump with a hose. The cups create a vacuum seal against the skin to promote blood flow and healing.

Product Overview

Professional Cupping Therapy Solution

This comprehensive cupping therapy set is designed to relieve physical fatigue and promote healthy blood circulation. The kit includes a variety of transparent plastic cups in multiple sizes, a hand-operated suction pump with an extension hose, and a durable carrying case for organization. It is a versatile tool suitable for both professional clinical use and personal home health care.
