

Currency Counter and Sorter

This device automates the counting and sorting of currency. It includes a digital display, input hopper, and output stacker for streamlined operation.

Overview

Professional Currency Handling Solution

This advanced currency counter and sorter is designed to streamline cash management operations in high-volume business environments. Featuring an intuitive digital interface, it efficiently processes, counts, and validates banknotes with precision. The robust, mobile cabinet design ensures it can be easily repositioned to suit the workflow of banks, retail centers, or large cash handling facilities.
