

# Currency Counter with Counterfeit Detection

This high-speed currency counter is designed for accurate and efficient money counting. It includes counterfeit detection, batch counting, and add functions for use in banks, retail, and cash-intensive environments.

## Product Overview

### High-Speed Currency Management Solution

This high-speed currency counter is engineered for accurate and efficient money processing in cash-intensive environments such as banks and retail businesses. It features advanced sensor technology to ensure precise counting while simultaneously performing reliable counterfeit detection. With an intuitive interface and large display, this device simplifies daily cash handling operations and minimizes errors.

## Key Features

### Operational Benefits

- Advanced sensors for precise counting
- User-friendly interface
- Large, easy-to-read display
- Suitable for high-volume cash environments

### Core Functionality

Counterfeit Detection, Batch Counting, Add Function, Multi-Currency Support

## Usage

### Suitable Environments

Banks • Retail Stores • Cash-Intensive Businesses
