

Currency Counting Machine with Counterfeit Detection

This professional currency counting machine is designed for efficient and accurate money processing. It is equipped with advanced counterfeit detection features, including UV, MG, and IR sensors, ensuring the authenticity of banknotes.

Overview

Professional Cash Handling Solution

This currency counting machine is designed for high-efficiency money processing in cash-intensive environments like banks and retail businesses. It integrates advanced counterfeit detection technologies, including UV, MG, and IR sensors, to ensure the authenticity of every banknote. With high-speed counting capabilities and versatile modes such as batch and mixed denomination counting, it offers both speed and precision for daily operations.
