

# Currency Sanitizing Cabinet with UV-C Technology

This currency disinfection cabinet is designed for effective virus prevention and disinfection of banknotes. It utilizes advanced UV-C light technology to eliminate bacteria and viruses from the surface of currency, ensuring a safer handling experience.

## ADDITIONAL IMAGES

## Product Overview

### Professional Currency Hygiene Solution

This currency sanitizing cabinet is designed to ensure safe handling of cash in high-traffic environments like banks, retail stores, and financial institutions. Utilizing advanced UV-C sterilization combined with medium-temperature drying, it provides 360-degree disinfection to eliminate bacteria and viruses from banknotes. The unit features intelligent touch operation, automatic safety door controls, and a durable stainless steel interior for long-term reliability.

## Key Features

### Safety Mechanisms

- Safety door control (auto-stop on open)
- Intelligent temperature control
- 360-degree coverage

Model Number	XDZ48-A2
Disinfection Technology	UV-C Light, Medium Temperature Drying

## Technical Specifications

Disinfection Temperature	70 °C
Internal Liner Material	Stainless Steel

## Operation

### Available Modes

Auto Mode • Quick Disinfection

Control Interface	Intelligent Touch Operation
