Product Overview

Professional Grade Pruning Saw

This curved blade pruning saw is engineered for high-efficiency cutting and pruning in both professional landscaping and home gardening environments. Featuring a durable high-carbon steel blade with precision-ground, impulse-hardened teeth, it ensures smooth, clean cuts that minimize branch damage. The ergonomic PP+TPR grip is designed to reduce hand fatigue during extended use, providing a secure and comfortable hold for all-day reliability.

Technical Specifications

Blade Length	330 mm
Blade Treatment	Three Side Grind Teeth, Baking Treatment, Impulse Hardened

Design & Ergonomics

Handle Material	PP+TPR
Handle Design	Ergonomic Grip

Usage

Ideal Applications

- Trimming branches
- Shrub maintenance
- Orchard pruning
- Garden vegetation management
