

Curved Blade Pruning Shear with Wooden Handle

This pruning shear features a curved blade for efficient and precise cuts. It is constructed with a durable metal body and fitted with a long wooden handle for comfortable grip and extended reach.

Product Overview

Professional Pruning Performance

This professional-grade pruning shear features a precision-engineered curved cutting blade designed for efficient and clean cuts. The construction utilizes high-quality alloy steel for the blade and a durable stainless steel body, ensuring longevity and performance. Fitted with ergonomic wooden handles, this tool provides a comfortable grip and extended reach, making it an ideal choice for gardening and landscaping applications that require precise plant care.

Technical Specifications

Blade Material	Alloy Steel
Blade Processing	Heat Treated, Drop Forged
Body Material	Stainless Steel
Handle Material	Wood

Design Features

Design Highlights

- Curved blade geometry for precision cutting
- Ergonomic wooden handle design
- Drop forged construction for enhanced durability
- Corrosion-resistant stainless steel body
