

Curved Glass Door Display Freezer

This display freezer features a special curved glass door design that enhances product visibility and minimizes condensation. It has a splicing frame with various color options and optional aluminum or plastic frame connection material.

Overview

Professional Display Solution

This curved glass door display freezer is designed for high-visibility commercial environments like supermarkets and convenience stores. With a generous 359-liter capacity and an ergonomic curved design, it offers both excellent product showcasing and convenient access for customers. The unit features robust cooling capabilities, reaching deep-freeze temperatures quickly while maintaining reliable performance during power outages.
