

Curved Glass Top Chest Freezer

This chest freezer is designed with a curved glass top for showcasing frozen goods. It utilizes a refrigeration system to maintain ideal temperatures, making it suitable for supermarkets and convenience stores.

Product Overview

Professional Display Freezer

This curved glass top chest freezer is engineered for optimal product visibility and thermal efficiency in commercial settings. Featuring a heat-reflective tempered glass door, it ensures contents remain clearly visible while maintaining strict internal temperatures. The robust design includes a stepped-maze cabinet frame for superior cold retention and a straight drainage structure for easy maintenance.
