

Curved Glass Top Chest Freezer for Display

This chest freezer is designed for displaying frozen goods. It features a transparent curved glass lid, casters for mobility, and temperature control.

Overview

Professional Display Freezer

This curved glass top chest freezer is engineered for high-visibility product display in commercial environments like supermarkets and convenience stores. It features advanced thermal insulation with a stepped-maze cabinet design and heat-reflective tempered glass to ensure consistent cooling efficiency. Built for durability and ease of maintenance, the unit includes a robust PCM liner and a convenient drainage system.

Design & Construction

Glass Technology	Heat-reflective coated tempered glass
Interior Liner	PCM (Pre-Coated Metal)
Cabinet Construction	Stepped-maze frame for enhanced cold retention
