

Curved Grader Blade

This is a ground engaging tool used for grading. The curved grader blade is engineered to withstand harsh working conditions and deliver consistent results.

Product Overview

High-Performance Curved Grader Blades

These curved grader blades are engineered for demanding earthmoving and construction environments. Designed to withstand harsh working conditions, they provide efficient material handling and ensure smooth, consistent surface finishing. Each blade is manufactured with precision to deliver optimal performance and long-lasting durability across a wide range of grading applications.

Compatibility & Applications

Suitable Equipment

Excavators, Backhoe Loaders, Bulldozers, Compactors, Loaders, Scrapers

Technical Specifications

Part Numbers & Dimensions

Product Range

Available Ground Engaging Tools

- Bucket Teeth
- Tooth Adapters
- Ripper Shanks
- Ripper Points
- Cutting Edges
- Grader End Bits
- Segments
- Chocky Bars
- Wear Buttons
- Wear Blocks
