

Curved Long Nose Pliers

Curved long nose pliers are designed for precision work in tight spaces. The pliers are suitable for gripping, bending, and cutting wires and components in electronics and jewelry making.

Overview

Precision Curved Long Nose Pliers

Designed for intricate tasks, these curved long nose pliers offer exceptional maneuverability in confined spaces. The specialized curved design allows users to navigate around obstructions, making them an essential tool for electronics assembly, jewelry manufacturing, and delicate wire work. Engineered for comfort and durability, they feature ergonomic handles that minimize hand strain during extended use.

Key Features

Handle Design

Ergonomic • Non-slip Grip • Dual-color

Primary Applications

Electronics, Jewelry Making, Wire Bending, Precision Gripping
