

Curved Pruning Saw with High Carbon Steel Blade

This curved pruning saw features a high carbon steel blade, designed for efficient cutting of branches and limbs. It has an ergonomic handle that provides a comfortable grip and reduces fatigue during prolonged use.

Product Overview

Professional Grade Pruning Performance

This curved pruning saw is engineered for high-efficiency cutting of branches and limbs, making it an essential tool for professional arborists and landscapers. The high carbon steel blade is designed for both push and pull cutting actions, ensuring versatility across a wide range of gardening tasks. Its ergonomic handle is specifically shaped to provide a comfortable grip, effectively reducing user fatigue during prolonged use.

Technical Specifications
