

Curved Pruning Saw with Sheath

This curved pruning saw is designed for efficient cutting of branches and limbs. It features an ergonomic handle and includes a sheath for safe storage.

Product Overview

Professional Pruning Performance

This curved pruning saw is engineered for professional gardening and landscaping requirements. The ergonomic handle is designed for a secure and comfortable grip, while the aggressive blade tooth pattern ensures efficient cutting of branches and woody limbs. Each unit comes with a durable protective sheath for safe storage and easy portability on the job site.
