

Custom Broadcasting Console with Acoustic Dampening and Integrated Sink

This custom console is designed for professional broadcasting environments. It incorporates acoustic dampening panels, sound diffusion elements, and an integrated sink.

Product Overview

Professional Broadcasting Console

This custom-built broadcasting console is engineered to provide a sophisticated environment for media professionals. Featuring integrated acoustic dampening with a diamond lattice pattern and a specialized ribbed sound diffusion section, it ensures high-fidelity audio quality. The console includes an integrated sink for convenient on-site maintenance, all housed within a sleek, dark stone construction.

Construction & Design

Integrated Features

- Diamond lattice acoustic panel
- Ribbed sound diffusion element
- Integrated oval-shaped sink

Build Material

Dark stone finish (granite-style)

Acoustic Performance

Absorption Technology

Diamond lattice pattern, Acoustic dampening

Diffusion Technology

Ribbed surface scattering
