Product Overview

Premium Custom Extruded Aluminum Profiles

These custom-designed extruded aluminum angle profiles are engineered for high-performance industrial and construction applications. Crafted from high-quality 6063 aluminum alloy, they feature an anodized finish for enhanced durability and corrosion resistance. Designed to meet precise project requirements, these profiles provide consistent structural integrity and aesthetic versatility.

Material & Finish

Available Colors

Gold • Black • White

Material Alloy

6063 Aluminum

Surface Treatment

Anodized

Applications

Typical Applications

- Construction
- Building Material Machinery
- Heat Sinks
- Industrial Frameworks
