

Custom Precision Laser Cutting Service

Precision laser cutting services are available for custom projects. The service is ideal for manufacturing and engineering applications requiring intricate designs and accurate cuts.

Overview

Precision Laser Cutting & Fabrication

This professional laser cutting service specializes in high-precision metal processing based on custom technical drawings. With extensive experience serving international markets, the service utilizes advanced high-power machinery to deliver high efficiency and cost-effective sheet metal fabrication. Capabilities include laser cutting, bending, riveting, and welding for a diverse range of industrial applications.

Technical Capabilities

Max Laser Power

15000 KW

Laser Cutting Capacity

Equipment Assets

- High-power laser cutting machines
- 4m / 6m plate shearing machines
- Bending machines
- CNC machine tools

Core Processes

Laser Cutting, Sheet Metal Fabrication, Riveting, Welding, Bending, Shearing

Quality & Compliance

Export Markets

Europe • America • Japan • Korea
