

# Custom Sheet Metal Components

These are custom sheet metal parts manufactured using laser cutting and sheet metal fabrication techniques. The parts are made in China.

## Overview

### Custom Sheet Metal Fabrication

This service provides precision sheet metal fabrication, including laser cutting, bending, and riveting welding. With advanced machinery and experienced technicians, we deliver high-quality components tailored to specific design requirements. Our capabilities support a wide range of industrial applications, ensuring efficient production and consistent quality for global standards.

## Capabilities

### Key Machinery

- 15000KW Laser Cutting Machine
- 4m / 6m Plate Shearing Machine
- Bending Machines
- CNC Machine Tools

### Processing Methods

Laser Cutting, Sheet Metal Fabrication, Riveting, Welding, Bending, Shearing

## Manufacturing Details

### Facility Area

**6000 sqm**  
Area

### Workforce

39 employees

### Established

2008

## Experience & Reach

### Export Markets

Europe, America, Japan, Korea
