

Custom Stainless Steel Sheet Metal Stamping

This is a custom stainless steel sheet metal part formed using laser cutting, stamping, and bending. The component is suitable for various industrial applications requiring robust and custom-designed metal parts.

Product Overview

Custom Metal Fabrication Solutions

These professional-grade sheet metal components are engineered for precision using advanced laser cutting, bending, and fabrication techniques. Designed for versatility, the parts are manufactured from high-quality stainless steel to meet rigorous industrial standards. This fabrication service supports complex geometries and assembly requirements, making it an ideal choice for diverse engineering applications requiring robust and custom-designed metal parts.

Material Grades

Stainless Steel 316, Stainless Steel 303, Stainless Steel 304

Manufacturing Capabilities

Core Processes

- Laser Cutting
- Sheet Metal Fabrication
- Riveting
- Welding
- Bending

Equipment & Machinery

- 15000KW Laser Cutting Machine
- High Power Laser Cutting Systems
- 4m / 6m Plate Shearing Machines
- Bending Machines
- CNC Machine Tools

Production Capacity & Standards

Facility Metrics

6000 sqm

Facility Area

39 staff

Skilled Workforce
