

CUT50 Plasma Cutter

The CUT50 plasma cutter is a versatile and efficient cutting tool designed for various metal cutting applications. It features a compact design, user-friendly controls, and reliable performance.

Product Overview

Professional Performance

The CUT50 Plasma Cutter is a versatile and efficient tool engineered for precision metal fabrication, maintenance, and repair. Utilizing advanced inverter technology, it ensures stable, reliable power output for consistent cutting performance. Designed for both professional and DIY environments, it offers adjustable power settings to accommodate various material thicknesses with ease.

Technical Specifications

Rated Cutting Current

50 A

Rated Current

Technology	Inverter Air Plasma
Compatible Materials	Steel, Stainless Steel, Aluminum, Copper

Features & Safety

Safety Protections

- Overvoltage protection
- Overheating protection

Included Accessories

Included Components

- Plasma torch
- Ground clamp
- Air regulator
- Consumables
