

# Cutaway Ball Valve with Blue Handle

This cutaway valve displays the internal components of a ball valve. It features a metallic ball with a bore that aligns with the pipe to allow flow and a blue handle for manual operation.

## Product Overview

### Professional Grade Cutaway Ball Valve

This precision-engineered ball valve features a clear cutaway design, allowing for a comprehensive view of the internal sealing mechanism and ball rotation mechanics. Constructed with a robust brass body, it is designed for reliable flow control in various piping applications. The manual operation is facilitated by a high-visibility blue handle, providing an intuitive interface for system operators.

## Technical Specifications

Handle Color

Blue

Valve Type

Ball Valve

Body Material

Brass

Operation Method

Manual (Handle)

Connection Type

Threaded

Key Features

Cutaway view, Polished ball surface, Easy installation, Quarter-turn operation
