Product Overview

Professional Grade Coupling Clamp

This stainless steel CV coupling clamp is engineered for secure and reliable fastening in demanding automotive, plumbing, and industrial environments. Featuring a robust construction with an adjustable tightening mechanism, it ensures a strong, leak-proof seal for critical connections. Designed to meet high-performance standards, this component offers durability and ease of installation for professional applications.

Technical Specifications

Key Features

- Adjustable clamping force mechanism
- Robust stainless steel construction
- Leak-proof sealing capability
- Versatile industrial and plumbing application

Material	Stainless Steel
Compatible Pipe Size	DN100

Compliance & Standards

Standards Compliance	EN877, CE
