

Cyanoacrylate Adhesive for Wood, Rubber, Plastics, Metal, and Leather Bonding

This fast-bonding cyanoacrylate adhesive is suitable for bonding wood, rubber, plastics, metal, and leather. It provides a strong and durable bond for various applications.

Overview

High-Performance Cyanoacrylate Adhesive

This high-performance cyanoacrylate adhesive is engineered for rapid, reliable bonding across a diverse range of materials. It provides a strong, durable connection suitable for wood, rubber, plastics, metal, and leather applications. Designed for professional use, this adhesive ensures precision and strength in every application.

Product Specifications

Performance Characteristics

- Fast-bonding
- Strong and durable bond
- Versatile material compatibility

Net Weight	3 g
Compatible Materials	Wood, Rubber, Plastics, Metal, Leather
Adhesive Type	Cyanoacrylate
