

Cyanoacrylate Adhesive for Wood, Rubber, Plastics, Metal, and Leather

This super strong adhesive glue is suitable for bonding wood, rubber, plastics, metal, and leather. This cyanoacrylate adhesive offers a reliable and durable bond for various materials, packaged for convenience and ease of use.

Product Overview

High-Performance Cyanoacrylate Adhesive

This professional-grade cyanoacrylate adhesive is engineered to provide a rapid, high-strength bond across a diverse range of materials including wood, rubber, plastics, metal, and leather. Designed for versatility and reliability, it ensures durable connections for various repair and assembly applications. The convenient tube packaging allows for precise application, making it an essential tool for both industrial and general-purpose bonding needs.

Technical Specifications

Bond Characteristics

Super Strong • Fast Acting • Reliable

Net Weight	3 g
Compatible Materials	Wood, Rubber, Plastics, Metal, Leather
