

Cycling Gloves with Breathable Fabric

These cycling gloves are made from breathable jersey bond material. They are designed for comfort and performance during cycling activities.

Overview

High-Performance Cycling Protection

These cycling gloves are engineered for professional and recreational riders seeking a balance of comfort and control. Featuring breathable jersey bond fabric with an integrated film, they ensure optimal moisture management during intense activities. The ergonomic design includes reinforced padding and secure closures to reduce hand fatigue and enhance grip on all terrains.

Product Details

The jersey bond material with breathable film ensures comfort and performance.

Item Number	KCY-C20-34
Material	Jersey Bond, Breathable Film

Key Features
