

Cycling Gloves with Enhanced Grip

These cycling gloves offer enhanced grip and comfort for cycling. They are designed with durable materials to provide protection and improve performance.

Product Overview

Professional Cycling Performance

These high-performance cycling gloves are engineered for optimal grip, comfort, and breathability across various cycling disciplines. Featuring a durable microfiber palm and a flexible knitted elastic back, they provide a snug fit with maximum ventilation. The integration of silicone finger prints and neoprene cuffs ensures superior control and a secure seal for intense outdoor activities.

Technical Specifications

Item Number	KCY-C20-27
