

Cycling Gloves with Enhanced Grip

These cycling gloves offer enhanced grip and comfort for riders. They feature breathable fabric and reinforced padding for vibration absorption.

Product Overview

Ergonomically designed for optimal grip and control during outdoor activities.

High-Performance Cycling Gloves

These professional-grade cycling gloves are designed to provide a blend of comfort, grip, and style for various cycling disciplines. Featuring a breathable palm with strategic perforations and a flexible knitted elastic back, they ensure optimal ventilation and a secure fit. The durable construction includes reinforced stitching and silicone finger prints for enhanced control during road cycling or mountain biking.

Technical Specifications

Detailed view of the microfiber palm, silicone finger prints, and neoprene cuff.

Material Composition

Component	Material
Palm	Microfiber
Back	Knitted elastic fabric
Cuff	Neoprene
Finger Detail	Silicone print

Item Number: KCY-C20-26

Key Features
