

Cycling Gloves with Padded Palm

These cycling gloves are designed with padded palms to provide shock absorption and enhance grip. The breathable materials and secure fit ensure comfort and control during various cycling activities.

Product Overview

High-Performance Cycling Gloves

These cycling gloves are engineered for both road and mountain biking, featuring a microfiber palm with SBR cushioning for superior shock absorption. The jersey fabric back ensures maximum breathability and flexibility during long rides, while the integrated silicone printing provides an enhanced grip. Designed for the modern rider, the fingertips are touchscreen compatible, allowing for easy device operation without removing the gloves.
