

## Cycling Gloves with Padded Palm

These cycling gloves provide comfort and shock absorption during rides. They feature breathable fabric and padded palms for enhanced grip and control.

### Product Overview

Ergonomic design focused on optimal grip and hand protection.

### High-Performance Cycling Comfort

These half-finger cycling gloves are engineered for professional and recreational riders seeking a balance of protection and breathability. Featuring a specialized microfiber and SBR palm with silicone print cushioning, they provide superior shock absorption and grip. The mesh and spandex back ensures maximum flexibility and ventilation during intense rides.
