Overview

High-Performance Cycling Safety Helmet

This cycling helmet is engineered for both road cycling and mountain biking, balancing safety with aerodynamic efficiency. It features an advanced in-mould construction with a durable outer shell and an impact-absorbing EPS foam liner to provide superior protection. With 24 ventilation channels and a comfortable, removable liner, it ensures optimal airflow and cooling for long rides. The integrated head lock adjustment system allows for a secure and customized fit for various head sizes.
